

## Sovereign International Pension Services Newsletter

Panic and Chaos in the markets today as Britain has decided they are done with the EU. As that famous philosopher, Snagglepuss would say, "Heavens to Murgatroyd! Brexit, stage left!"

### United Kingdom votes for 'Brexit', what happens next?

It's finally happened. Britain is leaving the EU. Oddly the markets are in free fall as if this event was totally and completely unexpected. Come on! Odds were 50/50 or close to it so don't act so surprised.

I know some of you are going to hate me for saying this, but I'm glad. The question is who goes next: France? Italy? Denmark? or someone unexpected?

Why am I glad? I'm a believer in States' Rights and have been concerned for years over the increasing loss of sovereignty of our States. (There is a reason the word sovereign occurs in the name of my company.)

If I've been concerned about States' Rights at home, you can only imagine how tortured I've felt watching the formerly sovereign nations of Europe march towards Globalization. I hope this is the beginning of a major reversal.

In the meantime, those of you with exposure to US markets, foreign markets, the Euro and many other financial instruments are no doubt wishing you'd stayed in bed.

Let me keep this short and sweet. **You must protect your retirement plan from market disruptions like we are seeing today.** Watch out for greedy politicians, globalist and government watchdog groups who've been created with little or no checks and balances. (Think Consumer Financial Protection Bureau, CFPB.) There would be nothing you could do about it - they could drastically alter your retirement plan with the stroke of a pen.

CFPB- Partial quote. "CFPB's structure insulates it from political accountability and internal checks and balances in violation of the United States Constitution. Unbridled from constitutionally-required accountability," Friends of mine in the banking world have told me the CFPB has been devastating to their business. [https://en.wikipedia.org/wiki/Consumer\\_Financial\\_Protection\\_Bureau](https://en.wikipedia.org/wiki/Consumer_Financial_Protection_Bureau)

The second article in this newsletter contains a dire warning you should not miss!

*Read the rest of this newsletter for a better understanding of why you need to move at least a portion, if not all, of your IRA or retirement plan offshore.*

## URGENT WARNING! SOUND THE ALARM!

This very well may be the most important newsletter I've ever written. I don't say this lightly or with little forethought. I've been thinking about what I should say for several weeks. Sadly, no matter what I've seen or how I say it, there will be those who doubt my message or perhaps worse, those who still choose to take no action.

For years I've been talking about something I've carefully researched and feel very passionate about. I've shared a concern that I believe is becoming more and more likely and that is that the government is seeking more control over your IRA and pension plan. I think ultimately they want to finance their reckless spending habits by forcing us to invest our retirement plans into U.S. Treasuries. Whether they will require you to invest all, or a portion of your retirement assets into these instruments is hard to say.

## TAKE ACTION NOW! The President Just Fired the First Shot. Get your retirement plan offshore before it's too late!

I have to tell you I am really perplexed. You'd think with everything going on in the world, terrorism, market disruptions, weak economies, currency manipulations, and an overbearing, overreaching government, my phone would be ringing off the hook. Naturally you'd also think people would be scrambling to get their wealth offshore. But, I just don't see it and I'm not sure why.

Maybe our government has done a really good job at scaring people away from having assets outside of the United States by all of the reporting that's required like the FBAR form, and FATCA, yet it seems there has never been a more important time than right now to diversify your assets overseas.
